

# PVC is “Poisoning Nature”!

## SAY NO TO CHEMPLAST PVC PLANT IN CUDDALORE

**Chemplast’s PVC plant in Mettur discharges its poisonous effluents directly into the River Kaveri. Scientific analyses have revealed that the PVC effluents contain toxic and cancer causing chemicals like Vinyl Chloride and Ethylene Dichloride upto 20,000 times above safe levels. In Mettur, more than 2000 acres of farmlands and groundwater are contaminated by effluents from the company.**
